

# **Senate Committee Jurisdictions – 2025**

The following list shows the jurisdiction of each standing committee of the Senate, as shown by the state agencies, confirmations, and other issues over which the committee has jurisdiction. This list will be used as the primary basis for making bill referrals on introduction. Where a bill deals with issues under the jurisdiction of more than one committee, it will normally be referred first to the committee of primary concern, from which it may be referred to additional committees.

No list can dictate the proper committee of first reference for all bills, especially bills dealing with complex or sensitive issues of public policy. Questions about references should normally be worked out between the author and the affected committee chairs, in consultation with the President and the Chairman of the Committee on Rules and Administration as necessary. A Rule 4 objection can be made when consultation fails to resolve the disagreement.
